Menus and chapters created to your needs

Format **not** compatible with trial presentation software

## Sync'd DVDs / Sync'd & Link'd DVDs

---

LVS also offers Sync'd DVDs and Sync'd & Link'd DVDs. Sync'd DVD are MPEG-1 video that has been synchronized with the court reporter's transcripts. The Sync'd DVD allows for easy video review with key word searches and an easy-to-navigate scroll bar. Additionally, video clip creation is as easy as: highlight, drag and drop. Review the video & transcript using the pre-installed viewer or import into Visionary, TrialDirector, Sanction II, LiveNote or Summation.

Sync'd & Link'd DVDs offer the same benefits of Sync'd DVD and add in the convenience of linked exhibits. Every reference to an exhibit is hyperlinked in the transcript. By clicking on the hyperlink, the exhibit will appear to the right of the transcript. Simply put, it's the video, transcript and deposition exhibits all linked together on one DVD.

## Additional Video Services

---

In addition to our digital video services listed above, we do provide - the tried and true - VHS format copies when requested and VHS duplication for those instances when a CD or DVD isn't the right medium.
